8 February 1963
Copy 10 of 10

MEMORANDUM FOR: Chief, Operations Division, OSA

25X1A

SUBJECT : System [] Airborne Tests, Request
for

25X1A

1. []
Palo Alto, California, indicated by telecon on 8 February 1963 that the prototype model of the System [] will be ready for installation (preparatory to airborne tests) during the week of 11 February 1963. For production planning purposes, [] suggested the possibility of tests being scheduled during the week of 18 February or the week of 25 February. This possibility is being held in abeyance pending your advisement.

25X1A

25X1A

2. Accordingly, it is requested that necessary action be taken to arrange for the installation and testing of the prototype model. The outcome of the tests is desired to determine whether any changes may be required in the partially pre-fabricated production models now under construction.

3. It is further requested that arrangements pertinent to the technical performance of System [] include coordination with Chief, RAD/OSA. 25X1A
